

# WASTEWATER MAINTENANCE PRODUCT LINE

## DEGREASERS

**SUPER DIGEST** – Contains 20 billion per gram. The specific bacteria chosen will digest protein, starch, fat and cellulose when activated in water

**LIFT STATION DEGREASER** – This citrus-based solvent is designed to keep grease from accumulating in wetwells of sewage liftstations. It will float to the surface after the pumps go on and off.

**SEWER CLEAN 350** – A granular material, when poured into a pipe or pit that is clogged with grease, will heat up to 350 degrees and liquefy any hardened greases it comes into contact with. Contains a fluorescent dye for tracing.

**RED STREAK** – A non-acid product used to dissolve all cellulose materials such as tree roots and paper. Its caustic base is excellent for cutting through grease deposits in sewer pipes. It will not generate dangerous fumes.

**PLUG AWAY** – A granular caustic material that when poured into a sewer pipe will clean grease and slime from the pipe. Thus eliminating the source of hydrogen sulfide odors.

**TACKLE GTX** - A fully biodegradable citrus based cleaner. Its unique cleaning system will remove grease, tar and grime like no other cleaner.

## ODOR CONTROL

**BIG TIME** – This 20 lb. block will continuously mask foul odors for up to 3 months. Effective in liftstations, manholes and around the headworks areas at the plant.

**LITTLE TIME** – A 1 lb. deodorant block is great for freshening the air in fleet vehicles and in restrooms. It comes in plain and cherry scent.

**ODOR CONTROL GRANULES** – A mixture of absorbents in a cherry scent to mask foul odors in sewer, storm drains, grit bins and garbage cans.

**ODOR OUT** – Designed to work fast on foul odors from pets, trash, mildew and vomit. It leaves the air with a fresh lemon scent.

**AIRE SCENT** – A highly concentrated atmospheric deodorant that contains an active carrier of 40%. It normally dilutes 10 : 1 with water but can be diluted 50 : 1.

**SCENTROL** – This odor neutralizer eliminates foul odors in the air by oxidizing the bacteria that create the odors. It is water-soluble and can be placed in a tray to vaporize or it can be misted in the air by mechanical means. It will eliminate odors caused by hydrogen sulfide.

## POLYMER SOLVENT

**TWIN POWER** – This preventative maintenance product is designed to keep the belts on the belt press from building with polymer. It can be used in stronger concentrations to clean up polymer spills.

## SPECIALTY PRODUCTS

**POWER WASH** – Is a liquid concentrate especially formulated for cleaning cars, trucks and buses manually or with a high-pressure washer. It dilutes 40 : 1 with water.

**OXIDATION-X** – An acid cleaner that removes rust and scale from metal and concrete surfaces. Excellent for cleaning the ferrous chloride stains on concrete surfaces

**WASH-N-WAX** – Another unique blend of cleaner and wax in concentrated form for washing and waxing all types of vehicles with painted surfaces.

**VHT PAINT & CHEMICALS** – Spray paints, brake cleaner, anti-seize compound and belt dressing.

**GRANULAR CHLORINE** – 100 pound drums of 65% active in plastic containers, 99% active Trichlor and chlorine tablets.

**ANTI-MICROBIAL** – This hand cleaning sanitizer contains 1% Para-Chlorometa-Xylenol with lanolin and aloe vera.

**HUSKEY LUBRICANTS** – Greases, oils and food grade lubricants with U.S.D.A. H-1 ratings.

**RAP-O** – Manhole cover silencer.

**SEWER DYE** – Fluorescent green powder and liquid dye.

**TERAND AEROSOLS** – Any and all maintenance aerosols.

## PESTICIDES

**INSECTA-W** – A Non-restricted general use contact pesticide for sewer manholes.
